High Performance Composite Solutions

A system that can save you money and increase productivity.

Every company today is focused on increasing speed, reducing costs and improving profitability. While the answers to these questions are not easy, some ideas just seem to make sense. When it comes to material handling, increasing productivity is paramount and Fibergrate Composite Structures has partnered with another industry leader, KieTek International, to offer a system to help increase speed while simultaneously reducing costs. The system utilizing fiberglass grating and roller ball transfer units provides a versatile system that has helped many companies realize an immediate impact in productivity, efficiencies and reduced worker injuries.

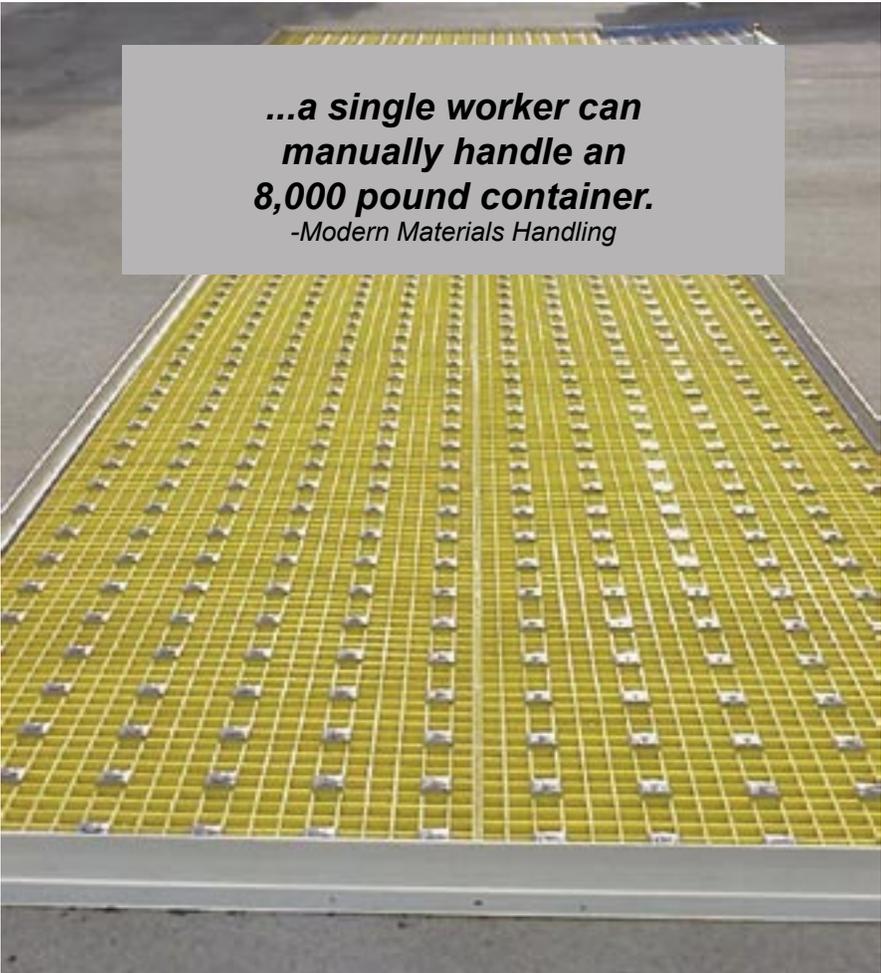

Fibergrate grating products offer a versatile system that can be easily reconfigured to meet operational changes. Because the system requires no welding or heavy equipment to move, the changes can be made quickly without expensive downtime. Fibergrate's yellow fiberglass grating provides a highly-visible, slip-resistant walking surface to ensure safety for employees.

KieTek holds the patent on the cube concept and offers the most cost effective and flexible options of ball transfer units in the marketplace today. KieTek designs the material handling solution around the customer's needs and provides turnkey material handling systems in the minimal amount of time. Systems can be customized from the type of roller, the loading capacity, and the variation in roll plane. Additionally, powered rollers can be incorporated to provide a conveyor system for continuous run applications.

The Fibergrate and KieTek material handling solutions provide a system that can be customized for your specific applications and concerns. It just makes sense to call Fibergrate at 800-527-4043 and discuss your requirements today.

Markets and Applications

- *Warehouses*
- *Distribution Centers*
- *Cartage*
- *Air Cargo*
- *Loading Docks*
- *Mezzanines*
- *Trucking*
- *Bottling Companies*
- *Grocery Chains*
- *Storage Facilities*
- *Canning Companies*
- *Everyone with material handling matters*

...a single worker can manually handle an 8,000 pound container.
-Modern Materials Handling

An Overview

WHAT YOU NEED

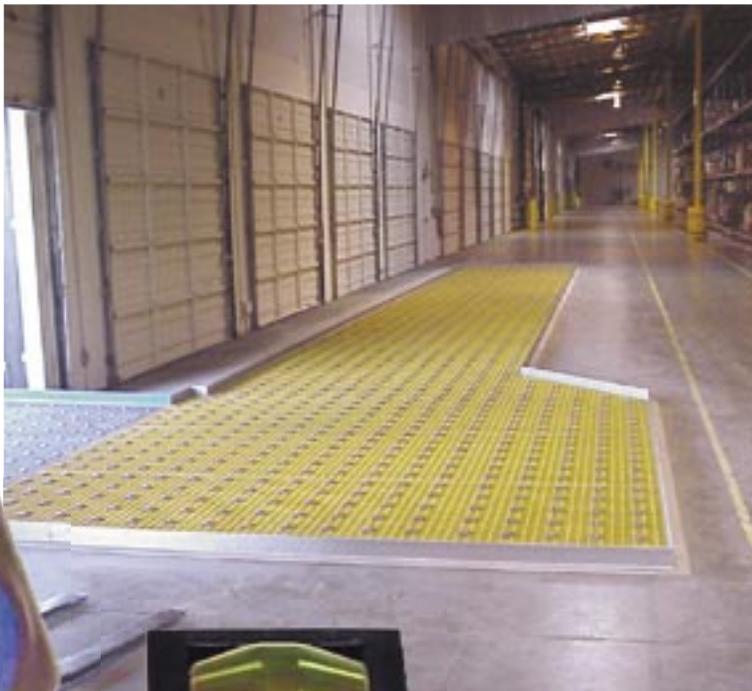

A material handling system that moves - increases productivity, increases efficiency and adds flexibility with quick cost returns.

WHAT YOU GET

The partnership between two industry leading companies, Fibergrate and KieTek, brings a customized solution designed to combat your specific concerns.

WHAT YOU GAIN

- An Increase in Efficiency and Productivity
- Reduced Risk of Back Injuries
- Continuous Moving Inventory
- Less Manpower and Equipment Needed
- Space Savings
- Versatile System for Changing Needs
- Safe Work Area for Associates
- Durable, Low Maintenance System

Fibergrate Products and Services

Fibergrate® Molded Grating

Fibergrate molded gratings are designed to provide the ultimate in reliable performance, even in the most demanding conditions. Fibergrate offers the widest selection in the market with more than ten resins and more than twenty grating configurations available in many panel sizes and surfaces.

Safe-T-Span® Pultruded Industrial and Pedestrian Gratings

Combining corrosion resistance, long-life and low-maintenance designs, Safe-T-Span provides unidirectional strength for industrial and pedestrian pultruded grating applications.

RIGIDEX® Moltruded® Grating

RIGIDEX moltruded gratings are the first fiberglass gratings to combine the corrosion resistance of molded grating with the longer span capacity of pultruded grating, all at the low cost of metal gratings.

Dynarail® Handrail

Easily assembled from durable prefabricated components or engineered to your specifications, Dynarail handrail meets or exceeds OSHA and strict building code requirements for safety and design.

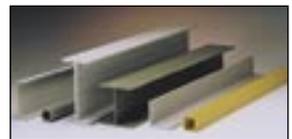

Dynarail® Safety Ladder System

Easily assembled on site, Dynarail safety ladder systems meet or exceed OSHA requirements. Though less costly than prefabricated ladder systems, these safety ladders provide a custom fit to the supporting structure.

Dynaform® Structural Shapes

Fibergrate offers a wide range of pultruded structural components for industrial use, including bars, rods, tubes, beams, channels, leg angles and plates.

Stair Solutions

Fibergrate offers a wide range of slip-resistant products to meet your stair safety needs. These durable products which include treads, tread covers and covered stair treads are a long-term, cost-efficient solution for your facility.

Grating Pedestals

Uniquely designed adjustable single and quad head pedestals for square mesh molded grating are manufactured to provide safe and economical support for elevated flooring.

Fabrication Services

Combining engineering expertise with an understanding of fiberglass applications, Fibergrate provides turnkey design and fabrication of fiberglass structures, including platforms, catwalks, stairways and test racks.
